Why should feminists care about christianity why should christians care about feminism in feminism and christianity riswold presents a collection of concise answers to basic questions like these in order to generate discussion about how the two can challenge each other and can even work together in the twenty first century situated firmly in the third wave of feminist activism and scholarship as well as in contemporary christian theology riswold addresses issues such as race class gender and sexuality with an affirmation of tradition alongside a push for change this book is an opportunity for christians to gain a fuller understanding of feminism moving beyond stereotypes and assumptions and into history and contemporary society simultaneously this book is an opportunity for feminists to understand the ongoing relevance of a religion whose social power and core commitments can contribute to a vision of a just human community the 1948 universal declaration of human rights has been called one of the most powerful documents in human history today the mere accusation of violations of the rights outlined in this document cows political leaders and riles the international community yet as a nonbinding document with no mechanism for enforcement it holds almost no legal authority indeed since its adoption the declaration's authority has been portrayed not as legal or political but as moral rather than providing a set of rules to follow or laws to obey it represents a set of standards against which the world's societies are measured it has achieved a level of rhetorical power and influence unlike anything else in modern world politics becoming the foundational myth of the human rights project seeing the myth in human rights presents an interdisciplinary investigation into the role of mythmaking in the creation and propagation of the universal declaration pushing beyond conventional understandings of myth which tend to view such narratives as vehicles either for the spreading of particular religious dogmas or for the spreading of erroneous even duplicitous discourses jenna reinbold mobilizes a robust body of scholarship within the field of religious studies to help us appreciate myth as a mode of human labor designed to generate meaning solidarity and order this usage does not merely parallel today's scholarship on myth it dovetails in unexpected ways with a burgeoning body of scholarship on the origin and function of contemporary human rights and it puts the field of religious studies into conversation with the fields of political philosophy critical legal studies and human rights historiography for reinbold myth is a phenomenon that is not merely germane to the exploration of specific religious narratives but is key to a broader understanding of the nature of political authority in the modern world the reader's guide to lesbian and gay studies surveys the field in some 470 entries on individuals adrienne rich arts and cultural studies dance ethics religion and philosophical issues monastic traditions historical figures periods and ideas germany between the world wars language literature and communication british drama law and politics child custody medicine and biological sciences health and illness and psychology social sciences and education kinsey report
