foreign bodies are a major reason for consumer complaints in the food industry the application of good manufacturing practice and hazard analysis throughout the whole food supply chain from plant to plate is the most effective way to prevent and reduce contamination and thereby protect consumers in addition detection equipment is part of the foreign body management system working in combination with upstream control measures to minimize the likelihood of product contamination detection equipment acts like an alarm to

warn about weaknesses in control measures this chapter presents basic working principles of metal detectors and x ray equipment some key rules to select the most adequate equipment and necessary concepts for their management
